Amazon buys Whole Foods

- “ Whole Foods' 430+ stores - many of them in prime locations - could bolster the network for AmazonFresh
- “ To ship efficiently groceries to consumers, you need physical distribution (item-picking to put parcels together, click-and-collect points) close to the consumer¹
- “ Stores are ideally located for that. They won't look like stores in five years' time, but they will be in those locations¹

¹ UK Business Insider 2017: Why Amazon is buying Whole Foods

POS is the core of the store Where is the POS ??

Net growth of brick and mortar stores in 2017

Brick and Mortar Stores Will Downsize. or At Least Shift Roles

Mobile is the key component

- “ Recent study indicated 82% on consumers consult their smart phone before buying
- “ Mobile phones will be more integrated in the shopping experience
 - Mobile couponing
 - Loyalty cards
- “ Your store employees will use their device more intensively (and will become wearables)
 - More apps
 - More tasks will be required
 - Cycle counts
 - Customer facing information on products
 - Allergic or not ?

Mobile and eCommerce are the only growing retail segments

eCommerce has changed consumer behaviors

Crowd-sourced service delivery models are changing paradigms

Consumers are more informed

The Honeywell Connected Retail Solution

Combined processes reduce travel time dramatically (for example, change price label while stocking)

System-driven shelf re-stocking proactively alerts store associates

Increasing shelf availability prevents lost sales

Solution Overview

- Honeywell Dolphin[®] 75e or CT50 mobile computer running Android[™] operating system
- iOS and Windows[™] 10 IoT available upon request
- SRX-SL . Slim Line Bluetooth[®] headset designed for the retail environment
- Honeywell Connected Retail voice-directed mobile store applications
- Honeywell Connected Retail web services software for rapid integration into retail systems
- Optional Goalpost labor management software available for ongoing worker analytics

Honeywell - Vocollect Value Proposition

Process

OPTIMIZE YOUR OPERATIONS

by providing smart innovative technology solutions designed to help optimize workflow processes

Ergonomics

PROVIDE A PREMIER WORKER EXPERIENCE

by engaging your workforce with an ergonomically optimized experience to make workers more effective

Information

IMPROVE YOUR BUSINESS DECISIONS

by providing accessible information to identify and mine rich veins of data and provide actionable insights

SRX-SL – The First Bluetooth™ Headset for Retail Workers

Approachable Design for Retail Environments

HONEYWELL'S WORKFLOW PERFORMANCE SOLUTION

FOR RETAIL
PROCESS FLOW

MAKING ALL OF THESE TASKS SIMPLE

As brick-and-mortar retailers compete with e-commerce for customers, Honeywell's Workforce Productivity Solution for In-store Retail delivers multi-tasking capabilities that improves productivity and customer's experience.

Using voice-directed software & data-capture technology the solution directs workers to multi-task cycle count, product look-up, customer assistance, shelf restocking & in-store fulfillment tasks – Interleaving Workflows.

Honeywell is delivering 20% productivity improvement for in-store retail workers and 25% reduction in shelf out-of-stock compared to traditional in-store inventory and task management solutions.

PRODUCTIVITY

Interleaves workflows via software instead of sequential task lists – saving time and increasing productivity of the worker.

STOCK TO SALES

Drives continuous cycle count/physical inventory so retailers can drive down out-of-stock items and improve supply chain metrics.

TRAINING

Provides navigation throughout the operation – driving faster adoption for seasonal- and new- employees.

ONLINE ORDER / INSTORE PICKUP

Delivers omni-channel differentiator for consumers by driving online order fulfillment in store w/out adding resources.

Certify Once. Deploy Many.

Mobility Edge: The power of a unified, dynamic platform

ACCELERATE DEPLOYMENTS

**Validate once.
Deploy everywhere.**

Faster, easier
deployments and
at lower cost.

OPTIMIZE PERFORMANCE

**Productivity-optimizing
tools.**

Faster data capture and
secure, enhanced worker
communications.

EXTEND LIFECYCLE

**Forward compatible.
Future-proof.**

Reducing TCO and
minimizing headaches.

Quality and Security Built-In

Extend Lifecycle

Forward compatible. Future-proof. Reducing TCO and minimizing headaches.

Battery Monitor

- At-a-glance indication of battery health and runtime remaining

Battery Runtime Maximizer

- Onboard tool to enable tuning of device settings and performance characteristics
- Allows optimization of tradeoffs between performance and runtime adjusted for individual customer preferences

Battery Hot Swap

- Enables exchange of battery pack without rebooting of system
- Simple user procedure to prepare system for battery swap

Operational Intelligence

- Active monitoring of internal functions with cloud-based analytics platform

Self Diagnostics

- Onboard application to exercise multiple device subsystems
- Supports customer troubleshooting, technical support, and service

Extended Availability

- Operating system support through Android Q
- 3 years support for security updates after each OS release
- 2+ years extended support for security updates following last supported OS version

Futureproof Platform

- New form factors leveraging common platform assures application compatibility and ease of deployment

Giving you the edge, every step of the way

Honeywell Enterprise Mobility ensures an effective, seamless mobile experience

Support for every stage in your mobility solution

Device Deployment

Initial device preparation, configuration, staging and kitting, including DEP/MDM configuration.

Helpdesk Support

Customer-branded, 24x7x365, direct to end-user support on demand.

Device Depot

Spare pool management, device replacement, asset recovery & warranty management.

Lifecycle Management

Out of warranty repair, device protection plans, device buyback services and recycling.

Procurement

Centralized procurement of wireless products and services.

Expense Management

Invoice processing, auditing and optimization of wireless and wireline expenses.

Mobile Software as a Service

Day-to-day administration of leading mobile software products.

Consulting Services

Expert guidance on mobile strategy and IT evaluation.

Resale Services

Sale of accessories, refurbished devices and third party software.
