A hand in a dark suit sleeve is drawing a white line graph on a transparent surface. The background is a blurred cityscape with green trees in the foreground. A large green and grey diagonal graphic is on the left side of the image.

We have the ability to bring about the transformations required by SUSTAINABILITY within an organization and to unleash the opportunities and benefits generated by this process.

Mihaela Croitoru
Senior Sustainability Consultant & Managing Partner

Gaetano Casale
Senior Sustainability Consultant & Managing Partner

Our experience enables us to provide the most effective consultancy services for the realization of the Non-Financial and Sustainability Reports using specific standards and methodologies such as the Global Reporting Initiative (GRI).

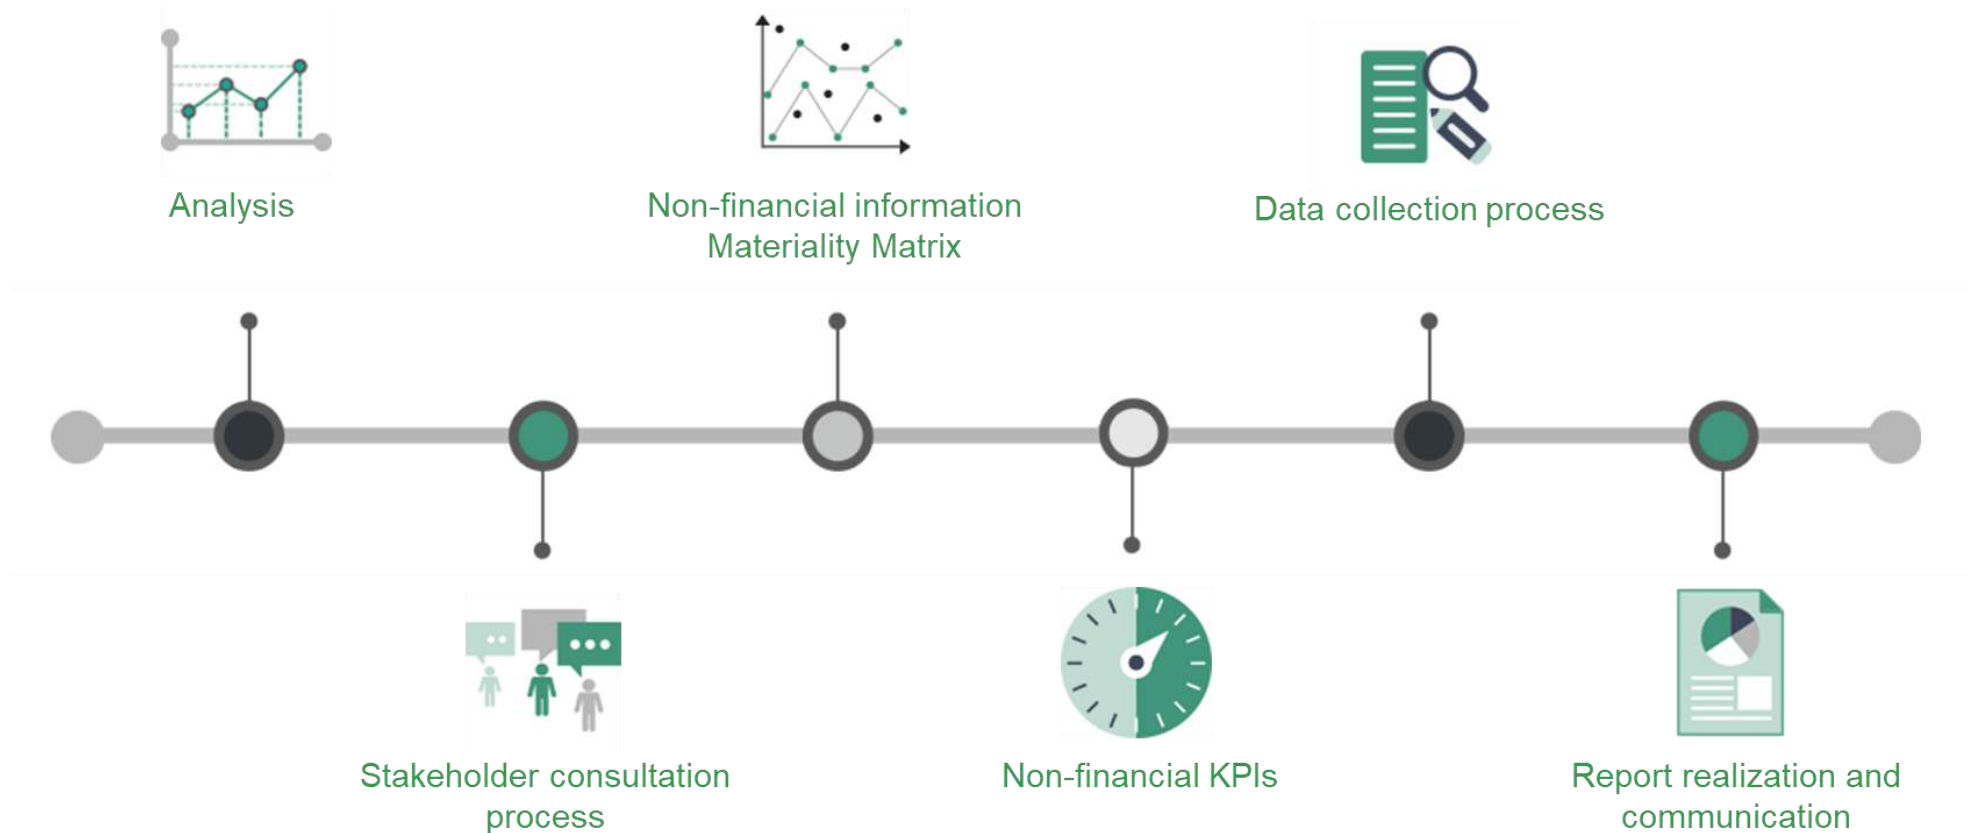

Integrating Sustainability practices into an organization means starting a process of change management. For this reason, we provide the CSR Manager Course, the Non-Financial Reporting Course, and other courses that integrate Sustainability issues.

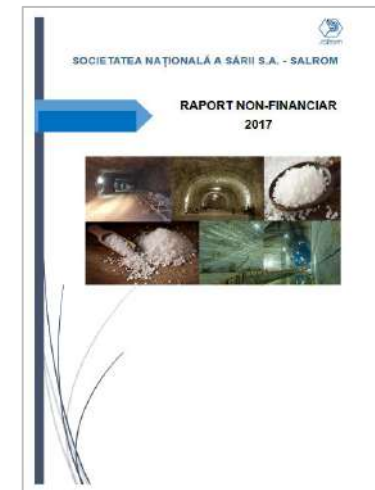

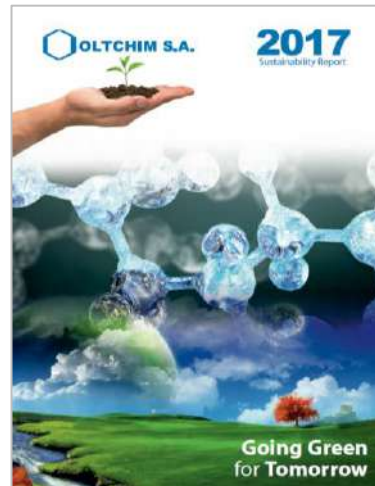

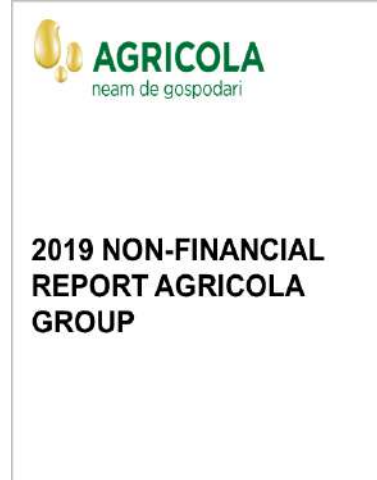

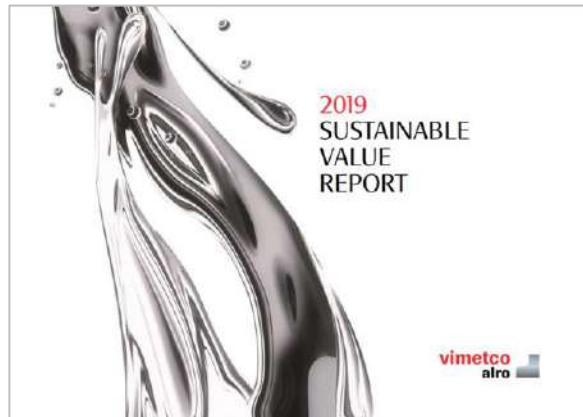

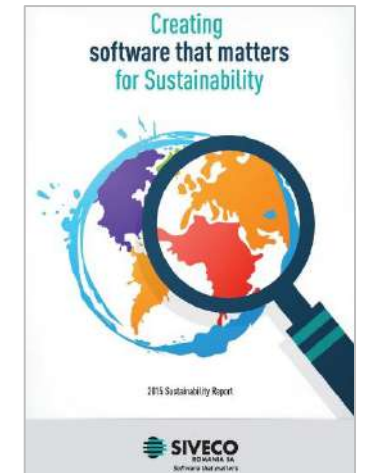

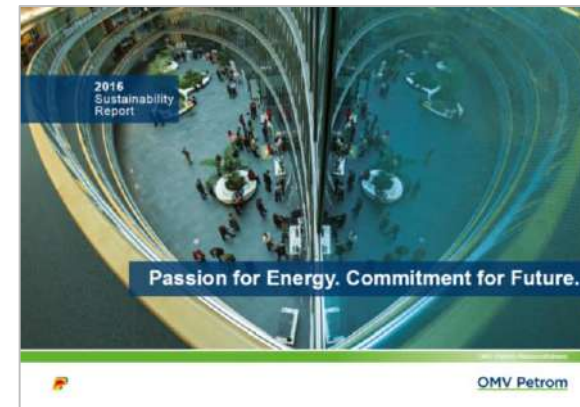

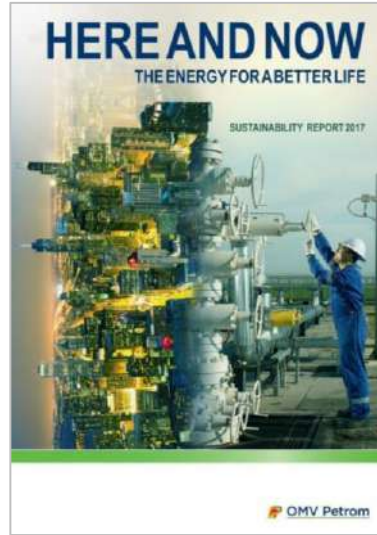

We approach differently every project that we manage for our clients. Our methodology for project management embraces not only the general principles but also sustainability indicators that we establish for each project.

► NON-FINANCIAL AND SUSTAINABILITY REPORTING ROAD MAP

To realize the Non-Financial and Sustainability Report, we have developed a methodology that allows us to go through all the necessary steps to comply with legal requirements and with the most important International Reporting Standards.

Our Clients for Non-financial and Sustainability Reporting
